

Danske Bank Cost handbook

See the estimated costs before you invest

A better overview of costs when investing with Danske Bank

When you make investment decisions, it is important to know the costs related to the potential trades. That is exactly the purpose of this handbook: Our wish is to ensure that it is easy for you as an investor to get information about the estimated costs regarding trading in specific securities, e.g. an equity or a bond.

On the following pages, you will find lists of the estimated costs related to buying and owning various types of securities. In the following pages you will find costs and charges examples for different products - we have separated product costs and service costs and you will find the cost both as an amount and percentage.

These costs are estimates based on generic examples of trades and ongoing costs. Even so, the handbook can provide a good overview, which may be valuable when you decide how to invest.

It is important to note that the costs in this overview are based on the standard and/or average costs and charges and do not take into account your personal discounts. Consequently, your individual costs may differ from what is listed here.

If you want to know the exact cost and charges related to a specific trade you consider entering, please contact Danske Bank.

We will inform you about your exact individual costs in the reports that you will regularly receive from us.

Please also note that for some other products, e.g. FX- products and interest rate derivatives, the information about the estimated costs is not included in this document but can be found in the materials, which describe these products.

You should take into account that some specific securities with the lowest costs might not necessarily generate the highest net profit. Additionally, some of the securities covered by the examples may not be suitable for you if they do not fit with your investment profile. Your profile is determined on the basis of your experience and knowledge, ability to bear loss, risk tolerance, time horizon, and objectives. Our advisors can help you to identify the investments, which are suitable for you.

For more information, please feel free to contact Danske Bank.
